ECONOMICS

Subject Code: HS7LXXX	Name: Spatial Econometrics
Pre-requisite(s): Applied Econometrics	
<p>Introduction to spatial data and spatial models: Geostatistical data; Lattice data; and Point data. Stationarity and Ergodicity of spatial random process. Characterising, Spatial Autocorrelation: Variogram, Semi-variogram; Covariogram and Correlogram. Fitting a Variogram: Minimum Norm Quadratic Estimation; Generalized Least Squares Estimation; Maximum-likelihood and Restricted Maximum-Likelihood Estimation. Spatial Prediction: Stochastic approach and decision-theoretic considerations. Spatial Interpolation: Ordinary Kriging; Kriging with Spatial Covariance. Spatial Econometrics and Regional Science: Moving from characterization of spatial pattern to deducing explanatory factors and inference. Spatial Dependence and Spatial Heterogeneity. The formal expression of spatial dependence structures: Spatial contiguity matrix, generalized spatial weight matrix; and spatial lag operators. Spatial externalities: Spatial multipliers and spatial regression; Global and Local Moran's-I Statistics.</p>	
<p>Text/Reference Books: 1. Spatial Analysis with R Statistics, Visualization, and Computational Methods, Second Edition. Tonny J. Oyana, CRC Press 2. Spatial Econometrics From Cross-Sectional Data to Spatial Panels by J. Paul Elhorst. Springer 3. Statistics for Spatial Data by Noel A. C. Cressie (Wiley-Interscience Publication) 4. Spatial Econometrics: Methods and Models by Luc Anselin (Kluwer Academic Press)</p>	

Subject Code: HS7LXXX	Name: Experimental Economics
<p>Introduction, Consistency of preferences – tests of rationality, Theories of risk. Objective and Subjective uncertainty, Other regarding preferences. Introduction to Game Theory, Coordination games and Prisoner’s dilemma. Repeated games, Limited strategic thinking: the beauty contest, Trust and reciprocity, Forward and backward induction. Games of asymmetric information (1): the takeover game, Games of asymmetric information (2): Auctions, Market experiments, Recent topics in experimental economics.</p>	
<p>Text/Reference Books:</p> <ol style="list-style-type: none"> 1. The Handbook of Experimental Economics, J. H. Kagel and A. E. Roth, Princeton University Press 2. Markets, Games & Strategic Behavior, C. A. Holt, Pearson Addison Wesley 	

Subject Code: HS7LXXX	Name: Labour Economics
<p>Introduction, Labour Demand and Labour Supply, Human Capital, Individual Wage Determination, Schooling, Experience, and Earnings. Unions and Collective Bargaining, Labour Migration, Economics of the Informal Sector, Globalization and Labour, Economics of Child Labour. Labour in India: Characteristics of the Indian labour force, Wages and employment in agriculture, Industry and services. Importance of the informal sector, Employment and labour welfare policy, Trade unions, Women in the labour force. Rural urban migration. Investment in human capital. Globalisation and labour market reforms. Wage inequality, Child labour.</p>

Subject Code:

Name: Second Language Acquisition and Learning

Introduction to SLA

Language learning in early childhood

Second Language Learning Overview

Second Language Learning Theories

Cross-linguistic Influences

Linguistic Environment

Cognitive Foundations

SLA development

Universal Grammar, Language Universals, Markedness

Interlanguage processes (Monitor Model, other models)

Individual Differences

Input, Output, noticing

Instruction and SLA

Non-language influences (motivation, aptitude)

Social Dimensions of L2 Learning:

- Vygotsky, Sociocultural Theory, and SLA
- CA for SLA

Subject Code:
HS7LXXX

Name: English Language Testing

Introduction: What is a language test?
Principles and purposes of assessment
Models of language ability and their implications for test design
Stages of test development
The assessment of listening and reading skills
The design of speaking and writing tests
The rating process
Validity and the process of validation
Statistical analysis of tests
Alternative forms of assessment
Formative assessment in the classroom
The educational and social impact of language tests
Computer-based testing and other innovations

Text/Reference Books:

Subject Code:

Name: Reading in Second Language

The nature of reading: Defining reading
Reading Comprehension processes
Models of Reading
L1 and L2 reading relationships
The social contexts of reading
Becoming a strategic reader
Vocabulary and reading comprehension
Reading fluency, reading rate, and comprehension
Active Reading Strategies
 a. Previewing, Pre-Reading, Skimming
Vocabulary in Context
 a. Review of parts of speech
 b. Using a dictionary
 c. Electronic resources
Vocabulary in Context
 c. Review of parts of speech
 d. Using a dictionary
 c. Electronic resources
Textbook Reading
 e. Common textbook features
 b. Strategies for effective textbook study
Effective note-taking
 f. Annotating texts
 g. Lecture notes
 c. Related study skills
Reading for the Main Idea
 h. Stated main ideas
 b. Implied main ideas
Supporting Details
Outlining, Summarizing
Patterns of Organization
Interpreting Graphics and Visual Aids
Critical Thinking (especially differentiating between Fact and Opinion)

PSYCHOLOGY

Subject Code: HS7LXXX

Name: Advanced Cognitive Psychology

- **Introduction to Cognitive Psychology:** Definition of cognitive psychology, the emergence of cognitive psychology, research method in cognitive psychology
- **Attention and Perception:** Attention, habituation and adaptation, automatic and controlled processes in attention, attention deficits, sensation, perception of objects and forms, Gestalt theory of Perception.
- **Memory:** Memory, models of memory, encoding and transfer of information, retrieval, forgetting and memory distortions, Theories of Memory
- **Language:** Definition and basic concepts of language, language comprehensions (words, semantics, syntax), and reading
- **Problem Solving and Creativity:** Problem-solving, types of problems, knowledge and problem solving, creativity
- **Decision Making and Reasoning:** Judgment and decision making, Deductive Reasoning, Inductive reasoning
- **Intelligence:** Definition and origin of intelligence, measurement of intelligence, exceptional intelligence, intelligence and personal factors, major theories of Intelligence

Text/Reference Books:

1. Fundamentals of Cognitive Psychology: R.T. Kellogg (2015)
2. Cognitive Psychology: Edward E. Smith & Stephen M. Kosslyn (2015)
3. Cognitive Psychology: E. Bruce Goldstein (2010)
4. Cognitive Psychology: Robert J. Sternberg & Karin Sternberg (2011)
5. An Introduction to Applied Cognitive Psychology (2016)

Subject Code: HS7LXXX

Name: Cross-cultural Psychology

- **Understanding cross-cultural psychology: Introduction and scope;** Perspectives on culture, Theories on cross-cultural psychology;
- culture and human nature, nature vs. nurture; **Research methods for cultural psychology:** Critical thinking, multicultural psychology, research and testing, world views
- **Culture and Cognition:** Sensation and perception, states of consciousness, self, intelligence, emotion, motivation
- **Development and Socialization:** Communication, cross-cultural contact and the process of acculturation, social perception
- **Culture and health:** Cultural differences in the definition of health, psychosocial and sociocultural influences on health, culture, and psychological disorder
- **Multicultural competency:** Identity development, attributions, work related values, workplace attitudes
- Future research directions in cross-cultural psychology.
