Are you crazy?

The tearful ISRO chairman, who was inconsolable in the Prime Minister's arms as he wept after the Moon lander lost control during Chandrayaan-2 mission, was in the town recently and regaling students with his 'crazy' sto-

ries. While addressing the IIT Bhubaneswar convocation ceremony, the humble scientist, K Sivan, said that one learns from one's mistakes. He encouraged the students to make mistakes, much to the delight of the audience. "Learn from your mistakes and do innovative things," said the chairman. Narrating his own experiences, he said his crazy ideas helped him earn a PhD (IIT Bombay). "Remember, most innovations come from crazy ideas!" he stressed.
