New Delhi: Even as top IITs ditched the final-year exams and an increasing number of exams were cancelled in view of the prevailing Covid-19 outbreak, IIT-Bhubaneswar showed the way by not only conducting the end-semester exams online, but ensuring 100% attendance.

This second generation IIT customised the online exam system so that the examination could be conducted in a comprehensive form without any compromises, yet ensuring that the students are not put at risk.

The end-semester examinations were conducted online between June 24 to 30, for the final year subjects where a total

The institute put in place a help desk to fix problems related to gadgets and internet connectivity

of 526 (which 100% of the batch size) students from BTech, dual degree, MSc, MTech and PhD participated.

Even though they were called 'online exams', the requirement of the internet was limited to question paper access, answer paper uploading and invigilating the participants. According to the IIT offi-

cial, the commercially available systems for online examinations are normally designed to hold computer-based tests and not for conventional examinations in a comprehensive form and have certain limitations.

The conceptual and architectural design of the system was provided by institute direc-

tor Professor R V Raja Kumar and the system was developed by computer and IT services cell (CITSC) of the institute.

Kumar, explained: "One of the challenges faced in the system design is to provide fairness of access to students who have a lot of variation in available gadgets and internet connectivity. Though the institute scheduled two examinations to facilitate the students to acquire facilities in case they do not have, all of them have availed the first opportunity and could take the exams successfully. In this system a conventional examination hall is made virtual, distributed across the personal environment of each student at their own home and the control also partially depends on the cooperation from each student."

The institute put in place a help desk which could interact, attend to and fix the problems such as those related to gadgets and internet bandwidth of the students during the exams making it successful for 100% of the students.

The institution kept a provision for two dates for the exams. If the students failed to appear in one, they could do so in the next. But all the students managed to appear in the exam on the first day itself.

P R Sahu, dean (academic), said the examinations could be conducted without any compromise with the regulations. The one change that was made was that the duration was reduced to two hours from the usual three.
