The students of IIT Bhubaneswar have received excellent pre-placement offers amid concerns of effective campus placements in 2020-21 due to Corona Virus (Covid-19) epidemic. This is being considered as the first offer to IIT students this year.

According to the official statement of IIT Bhubaneswar, the upcoming placement season is going to be very encouraging. Because many companies like Microsoft, Deshaw, Goldman Sachs and GEP Solutions select talented students through campus placements. These companies help the students to get real-time work experience.

The companies offer them pre-placement offers based on what the students perform during the internship at the company.

Director of the institute RV Raja Kumar said that this year the number of big companies in PPOs has increased. The offers the students have just received are more than the offers of last year. They hope that it will go above this now.

So far this year, CTC (lakh per annum, Cost to Company) package of Rs 43 lakhs has been received as a student pre placement offer. He said that most of the companies choosing students are important companies of the industry and the institute is trying to reach even better companies. The way the companies offered the package to the students, there are pleasant indications.

Director Kumar said that during the time of Corona epidemic, when the world economy is crumbling, the way companies are showing interest, there are very good signs about jobs. He said that not only did the new students of IIT Bhubaneswar get offers, but the senior's jobs were also going ahead with the package offered. This can be an example of a standard education.

He said that the placement season in IITs will start from online mode from 31 October 2020. Due to Corona, this trade of online is giving more safe and convenient environment to the students.
