Industry connect prog at IITBBS

Bhubaneswar: The Indian Institute of Technology (IIT) Bhubaneswar organised the first-ever industry alumni connect programme outside its home turf in Bangalore to attract industry captains to the institute.

The programme — which was organised by the alumni association of the institute at Bangalore International Centre on Saturday — has been aimed at showcasing IIT Bhubaneswar's primary areas of research and development in sectors such as energy, climate, water resources and internet of things.

The first programme was organised at IIT Bhubaneswar on Friday where its director RV Raja Kumar, along with the deans and heads of all seven schools of the institute, took part in a panel discussion.

"We are organising such a programme for the first time. The primary aim is to make industries aware of the research and development taking place in our institute and convince them to take our technologies," an IIT Bhubaneswar administrator said. **TNN**
