

Workshop on “Robotics”

A four-day workshop on “Robotics” was organised by the Design Innovation Centre at IIT Bhubaneswar from 9th to 12th December, 2015 in the Institute Auditorium. Thirty seven students from various schools of the institute participated in the event. In the workshop they learnt about various aspects of embedded robotics and had hands-on training on many types of sensors, actuators and controllers. On the final day of the event they built their own maze solving robots by applying all the skills that they had acquired during the workshop. The robots contested with each other in terms of speed and accuracy and smoothness in solving the maze and the winning robots were accorded with many prizes under various categories. Certificates of participation were given to all the participants who successfully completed the workshop.

Some memorable moments...
